(OWS) Oil/Water Separation

Best Auto Repair Environmental Practices

Why be concerned about oil/water separators?
- Eliminates contaminants
- Reduces hazardous waste

How do I keep oil and solids out?
- FILTER: The best way is to keep solids out of a vehicle and floor wash water.
- Use oil-only absorbents to separate and recycle oil from your OWS

Please keep the area clean. Do not leave anything outside the drum or on the ground!
