

# AEROSOL CANS RECYCLING PROGRAM

## SAINT REGIS MOHAWK TRIBE SOLID WASTE PROGRAM

### New Recycling Program

#### Starting July 31, 2023

Bring your aerosol cans to the Transfer Station for free starting July 31, 2023.

We are now equipped to properly dispose of aerosol cans. Aerosol cans have two hazardous waste characteristics, they are combustible and some are toxic.

Chemicals such as PCBs can damage the nervous & reproductive systems.

**We found several aerosol cans in the local trash samples, (*HW Material Flow Project.*)** Reminder that these items and other hazardous materials are prohibited from the municipal waste and are subject to a Drag Out Fee of \$35/item. Reduce aerosol cans by using other alternatives such as on the the Alternative Products List available at the link Below.
